PROFESSIONAL SUMMARY

Computer Science student at Cal Poly SLO (GPA: 3.977) concentrating in Artificial Intelligence and Machine Learning, with hands-on experience designing, building, and deploying AI-powered applications involving speech recognition, audio processing, and real-time workflows. Passionate about solving real-world problems through software engineering and excited to contribute to production AI systems.

EDUCATION

California Polytechnic State University, San Luis Obispo

B.S. Computer Science. Concentration: AI & Machine Learning. GPA: 3.977. Expected May 2029

Relevant Coursework: Data Structures, Calculus I–III, Linear Algebra, Transition to Advanced Mathematics, System Software Mechanics, Introduction to Computer Systems

EXPERIENCE

Live Commerce Operations Lead

Whatnot

- Led nightly live auctions generating \$1,000–\$4,000 in revenue per stream, contributing to \$82,000+ in total sales over two months while selling 7,000+ individual items.
- Owned end-to-end operations for a 7-person fulfillment team, with 2–3 members active per stream, coordinating inventory, logistics, and customer support for 100–200+ orders per session.
- Defined daily workflows, assigned responsibilities, and resolved operational issues to maintain fulfillment accuracy at high volume.

Cashier and Customer Service Representative

2023 – 2025

Lo Coco's Pizzeria

- Processed high volumes of customer transactions while maintaining service quality in a fast-paced environment.

PROJECTS

Auction Assistant (Python • Cloudflare Workers • Cloudflare D1 • OpenAI API • PWA)

<https://github.com/milesshoe>

Founder and Lead Developer

- Designed and built a cloud-native AI application that automates inventory tracking and fulfillment for high-volume live commerce sellers.
- Developed a client-server architecture using a Progressive Web App, Cloudflare Workers, and Cloudflare D1, securely processing audio without exposing API credentials.
- Implemented a speech-to-text and structured information extraction pipeline using OpenAI APIs to convert spoken auction sales into validated inventory records.
- Engineered a rule-based validation workflow that automatically flags incomplete or low-confidence AI outputs before persistence, improving fulfillment accuracy during operations processing 100–200+ orders per stream.

CO2 Emissions Linked List Analyzer

- Built a recursive linked-list system in Python to parse and analyze global CO2 emissions datasets, implementing filtering algorithms, recursive traversal, and unit tests.

Attention Mechanism Presentation (LLMs)

- Presented on the attention mechanism in deep learning and translated complex ML concepts into accessible explanations for a non-technical audience.

ACTIVITIES & LEADERSHIP

Transdisciplinary Leadership Program

2024–2025

Participant

- Conducted interdisciplinary research on AI, policy, and intellectual property; developed and presented solutions addressing ethical challenges in emerging technologies.

Computer Science + AI Club

2025–2026

Member

- Engaged in discussions and projects on real-world applications of AI and machine learning.

SKILLS

Frameworks and Tools: Codex, OpenAI API, Google Sheets API, PySide6, Pydantic, Cloudflare Workers, Cloudflare D1, Git, Codex, Claude **Programming Languages:** Python, JavaScript, C **Interests/Skills:** Machine Learning, Deep Learning, AI Ethics, AI Policy, Product Management,

ACTIVITIES

- Breakdancing: 9+ years of competitive experience including international competitions and performances.
- Freelance DJ (2025–Present): Performed live DJ sets for fraternity events and a paid fitness event at F45 Training.
